TITLE: TO SUPPLY LEFTOVER FOOD TO POOR USING SALESFORCE

Project Overview : Food wastage is a critical issue when large quantities of edible food are discarded while many people remain hungry. This project uses Salesforce CRM to build an application that manages the collection and distribution of leftover food. The system connects donors, drop-off points, volunteers, and NGOs to streamline the supply chain. With the help of custom objects, flows, triggers, and reports, the process is automated and transparent. The project demonstrates how technology can be applied to reduce food wastage and serve social welfare.

Objectives :

- **Enhance Food Distribution Efficiency:** Enable real-time tracking of leftover food collection and delivery to needy recipients.
- **Ensure Transparency:** Maintain accurate records of donations and recipient details to improve accountability.
- **Improve Volunteer Coordination:** Automate scheduling, notifications, and task assignments for volunteers.
- **Optimize Resource Management:** Track surplus food inventory and allocation for minimal waste.
- **Enhance Real-Time Visibility:** Provide live updates of available leftover food and its distribution status for donors, volunteers, and receivers. •

Promote Social Impact: Build a transparent and efficient system that encourages more participation from donors and volunteers in helping the poor.

Student Outcomes :

- **Hands-on Experience with Food Distribution Automation:** Students gain practical skills in configuring Salesforce objects, automating workflows, and managing real-time donation tracking.
- **Understanding of Project Lifecycle in Social CRM:** Students learn the complete end-to-end process from requirement gathering to deployment, enhancing their ability to execute real-world Salesforce projects.
- **Enhanced Analytical and Problem-Solving Skills:** Students develop the ability to identify operational challenges, design solutions, and troubleshoot issues effectively.
- **Improved Collaboration Skills:** Students gain experience in working as a team, coordinating tasks like requirement gathering, development, and testing.
- **Industry-Relevant Exposure:** Students get exposure to real-world use cases of Salesforce CRM in social good projects, preparing them for future career opportunities.

System Requirements :

Hardware Requirements:

- Computer with min/sum 4 GB RAM, Dual-core processor
- Stable internet connection

Software Requirements:

- Salesforce Developer Edition Org
- Modern Web Browser (e.g., Google Chrome, Firefox)

2

Phase 1: Requirement Analysis & Planning:-

To Supply Leftover Food to Poor:

Utilizing Salesforce, our project streamlines surplus food collection and distribution to the needy, ensuring efficiency and transparency.

Phase 2: Salesforce Development – Backend & Configurations:-

Milestone 1: Salesforce developer account creation

Activity 1: Creating Developer Account

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>

2. On the sign up form, enter the following details:

1. First name & Last name
2. Email
3. Role : Developer
4. Company : College or Company Name

4

5. County : India
- G. Postal Code : pin code
7. Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in the format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

5

1. Click on Verify Account
2. Give a password and answer a security question and click on change password.
3. Then you will redirect to your salesforce setup page.

Milestone 2 : OBJECT :-

To Navigate to Setup page:

LABEL	API NAME	TYPE	DESCRIPTION	LAST MODIFIED	DEPLOYED
Account	Account	Standard Object			
Activity	Activity	Standard Object			
Address	Address	Standard Object			
Agent Work	AgentWork	Standard Object			
Alternative Payment Method	AlternativePaymentMethod	Standard Object			
API Anomaly Event Store	ApiAnomalyEventStore	Standard Object			
Appointment Category	AppointmentCategory	Standard Object			
Appointment Invitation	AppointmentInvitation	Standard Object			
Appointment Invitee	AppointmentInvitee	Standard Object			
Appointment Topic Time Slot	AppointmentTopicTimeSlot	Standard Object			
Approval Submission	ApprovalSubmission	Standard Object			
Approval Submission Detail	ApprovalSubmissionDetail	Standard Object			
Approval Work Item	ApprovalWorkitem	Standard Object			
Asset	Asset	Standard Object			
Asset Action	AssetAction	Standard Object			
Asset Action Source	AssetActionSource	Standard Object			

To create an object:

- From the setup page > Click on Object Manager > Click on Create > Click on Custom Object.

Object Manager			
LABEL	API NAME	TYPE	DESCRIPTION
Account	Account	Standard Object	
Activity	Activity	Standard Object	
Address	Address	Standard Object	
Agent Work	AgentWork	Standard Object	
Alternative Payment Method	AlternativePaymentMethod	Standard Object	
API Anomaly Event Store	ApiAnomalyEventStore	Standard Object	
Appointment Category	AppointmentCategory	Standard Object	
Appointment Invitation	AppointmentInvitation	Standard Object	
Appointment Invitee	AppointmentInvitee	Standard Object

Approval Submission Detail	ApprovalSubmissionDetail	Standard Object	
Approval Work Item	ApprovalWorkItem	Standard Object	
Asset	Asset	Standard Object	
Asset Action	AssetAction	Standard Object	
Asset Action Source	AssetActionSource	Standard Object	

2. On Custom object defining page:

3. Enter the label name, plural label name, click on Allow reports, Allow search.

New Custom Object

Custom Object Definition Edit

Label: Account Example: Account
Plural Label: Accounts Example: Accounts
Starts with vowel sound:

The Object Name is used when referencing the object via the API.
Object Name: Account Example: Account

Description:

Context-Sensitive Help Setting: Open the standard Salesforce.com Help & Training window
 Open a window using a Visualforce page

Content Name:

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: Account Name Example: Account Name

4. Click on Save.

7

Activity 1: Create Venue Object:-

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >>

Click on Custom Object.

- a) Enter the label name >> Venue
 - b) Plural label name >> Venues
 - c) Enter Record Name Label and Format
 - Record Name >> Venue Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History,Allow Activities.
 3. Allow search >> Save.

Activity 2: Create Drop-Off Point Object:-

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
 - a) Enter the label name >> Drop-Off Point
 - b) Plural label name >> Drop-Off Points
 - c) Enter Record Name Label and Format
 - Record Name >> Drop-Off point Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History,Allow Activities
3. Allow search >> Save.

Activity 3: Create Task Object:-

To create an object:

1. From the setup page >> Click on Object Manager >> Click on Create >> Click on Custom Object.
 - a) Enter the label name >> Task
 - b) Plural label name >> Tasks
 - c) Enter Record Name Label and Format

- Record Name >> Task Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History,Allow Activities
 3. Allow search >> Save.

Activity 4: Create Volunteer Object:-

To create an object:

1. From the setup page >> Click on Object Manager>> Click on Create >> Click on Custom Object.
 - a)Enter the label name>> Volunteer
 - b) Plural label name>> Volunteers
 - c)Enter Record Name Label and Format
 - Record Name >> Volunteer Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History, Allow Activities
3. Allow search >> Save.

Activity 5: Create Execution Details Object:-

To create an object:

1. From the setup page >> Click on Object Manager>> Click on Create >> Click on Custom Object.
 - a)Enter the label name >> Execution Detail
 - b) Plural label name >> Execution Details
 - c)Enter Record Name Label and Format
 - Record Name >> Execution Detail Name
 - Data Type >> Text
2. Click on Allow reports and Track Field History, Allow Activities 9
3. Allow search >> Save.

Milestone 3 : TABS :-

What is Tab : A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Activity 1: Creating a Custom Tab:-

To create a Tab:(Venue)

1. Go to setup page >> type Tabs in Quick Find bar >> click on tabs >> New (under custom object tab)

2. Select Object(Venue) >> Select the tab style >> Next (Add to profiles page) keep it as default >> Next (Add to Custom App) uncheck the include tab . 3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.

Activity 2: Creating Remaining Tabs:-

1. Now create the Tabs for the remaining Objects, they are “Drop-Off Point, Task, Volunteer, Execution Details”.
2. Follow the same steps as mentioned in Activity -1.

Phase 3: UI/UX Development & Customization:

Milestone 4: THE LIGHTNING APP:-

Create a Lightning App:

To create a lightning app page

1. Go to setup page >> search “app manager” in quick find >> select “app manager” >> click on New lightning App.

2. Fill the app name in app details and branding as follow

- App Name : FoodConnect
- Developer Name : This will auto populated

- Image : optional (if you want to give any image you can otherwise not mandatory)
- Primary color hex value : keep this default.

3. Then click Next >> (App option page) Set Navigation Style as Standard Navigation >> Next.

4. (Utility Items) keep it as default >> Next.

5. To Add Navigation Items:

12

Search for the item in the (Home, Venue, Drop-Off Point, Task, Volunteer, Execution Details, Reports) from the search bar and move it using the arrow button

>> Next >> Next.

G. To Add User Profiles:

Search profiles (System administrator) in the search bar >> click on the arrow button

>> save & finish.

Milestone 5: FIELDS :-

Activity 1: Creation of Relationship Fields in Object:-

Creation of Lookup Relationship Field on Volunteer Object: 1. Go to setup

>> click on Object Manager >> type object name(Volunteer) in the search bar

>> click on the object.

The screenshot shows the Salesforce Setup interface for creating a new custom field. The left sidebar is titled 'SETUP > OBJECT MANAGER' and shows the 'Volunteer' object selected. Under the 'Fields & Relationships' section, the 'Relationships' tab is active. The main content area is titled 'Volunteer New Custom Field' and 'Step 1. Choose the field type'. The 'Data Type' section contains several options: 'None Selected' (selected), 'Auto Number', 'Formula', 'Roll-Up Summary', 'Lookup Relationship' (highlighted with a blue border), 'Master-Detail Relationship', 'External Lookup Relationship', 'Checkbox', and 'Currency'. Each option has a detailed description below it. At the top right of the main panel, there is a progress bar indicating 'Step 1' of 'Volunteer: New Custom Field - Salesforce - Developer Edition'. Below the progress bar are 'Next' and 'Cancel' buttons.

2. Now click on “Fields & Relationships” >> New
3. Select Master Detail relationship
4. Select the related object “Drop-Off point” and click next.
5. Field Name : Drop_Off_point
- G. Field label : Auto generated
7. Next >> Next >> Save.

Creation of Master-Detail Relationship Field on Execution Detail Object:

8. Go to setup >> click on Object Manager >> type object name(Execution Details) in the search bar >> click on the object.
9. Now click on “Fields & Relationships” >> New
10. Select Master Detail relationship
11. Select the related object “Volunteer” and click next.
12. Field Name : Volunteer
13. Field label : Auto generated
14. Next >> Next >> Save.

Creation of Master-Detail Relationship Field on Execution Detail Object:

15. Go to setup >> click on Object Manager >> type object name(Execution Details) in the search bar >> click on the object.
- 1G. Now click on “Fields & Relationships” >> New
17. Select Master Detail relationship

18. Select the related object “Task” and click next.
19. Field Name : Task
20. Field label : Auto generated
21. Next >> Next >> Save.

Creation of Look-Up Relationship Field on Drop-off Point Object:

22. Go to setup >> click on Object Manager >> type object name(Drop-Off Point) in the search bar >> click on the object.
23. Now click on “Fields & Relationships” >> New
24. Select Lookup relationship
25. Select the related object “Venue” and click next.
26. Field Name : Venue
27. Field label : Venue_c
28. Next >> Next >> Save.

Creation of Lookup Relationship Field on Task Object:

29. Go to setup >> click on Object Manager >> type object name(Task) in the search bar >> click on the object.
30. Now click on “Fields & Relationships” >> New
31. Select Lookup relationship
32. Select the related object “Venue” and click next.
33. Field Name : Sponsored By
34. Field label : Auto generated
35. Next >> Next >> Save.

Creation of Lookup Relationship Field on Task Object:

36. Go to setup >> click on Object Manager >> type object name(Task) in the search bar >> click on the object.

37. Now click on “Fields & Relationships” >> New

38. Select Lookup relationship

15

39. Select the related object “Drop-Off point” and click next.

40. Field Name : Drop-Off point

41. Field label : Auto generated

42. Next >> Next >> Save.

Activity 2: Creation of Fields for Venue Object:-

1. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Email” and Click on Next

4. Fill the Above as following:

- Field Label : Contact Email
- Field Name : Contact Email
- Click on required check box
- Click on Next >> Next >> Save and new.

To create another fields in an object:

5. Go to setup >> click on Object Manager >> type object name(Venue) in search bar >> click on the object.

G. Now click on “Fields & Relationships” >> New

7. Select Data type as a “Phone” and Click on Next

8. Fill the Above as following:

- Field Label : Contact Phone
- Field Name : Contact Phone
- Click on required check box
- Click on Next >> Next >> Save and new.

9. Select Data type as a “Geolocation” and Click on Next

10. Fill the Above as following:

- Field Label : Location
- Decimal Places : 4
- Field Name : Location

16

- Description : Enter the Geolocation of your Venue
 - Click on Next >> Next >> Save and new.
11. Select Data type as a “Long Text Area” and Click on Next
 12. Fill the Above as following:
 - Field Label : Venue Location
 - Field Name : Venue_Location
 - Click on Next >> Next >> Save and new.

Activity 3: Creation of Fields for Drop-Off Point Object:-

1. Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Geolocation” and Click on Next
4. Fill the Above as following:
 - Field Label : Location 2
 - Field Name : Gets auto generated.
 - Description : Enter the Geolocation of the Drop off Point
 - Geolocation Options : select Decimal
 - Decimal Places : 4
 - Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Drop-Off point) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Formula” and Click on Next

4. Fill the Above as following:

- Field Label : distance calculation
- Field Name : distance_calculation
- Formula Return Type : Number
- Formula Options : DISTANCE(Location_2_c , Venue_r.Location__c , 'km') 17
- Click on Next >> Next >> Save and new.

5. Select Data type as a “Picklist” and Click on Next

G. Fill the Above as following:

- Field Label : State
- Field Name : State
- Enter values, with each value separated by a new line :
Andhra Pradesh
Arunachal Pradesh
Assam
Bihar
Chhattisgarh
Goa
Gujarat
Haryana
Himachal Pradesh
Jharkhand

Karnataka

Kerala

Maharashtra

Madhya Pradesh

Manipur

Meghalaya

Mizoram

Nagaland

Odisha

Punjab

Rajasthan

Sikkim

Tamil Nadu

Tripura

Telangana

Uttar Pradesh

Uttarakhand

West Bengal

Andaman & Nicobar (UT)

Chandigarh (UT)

Dadra & Nagar Haveli and Daman & Diu (UT)

Delhi [National Capital Territory (NCT)]

Jammu & Kashmir (UT)

Ladakh (UT)

Lakshadweep (UT)

Puducherry (UT)

- Click on required check box
- Click on Next >> Next >> Save and new.

7. Select Data type as a “Number” and Click on Next

8. Fill the Above as following:

- Field Label : Distance
- Field Name : Distance
- Length : 14
- Decimal Places : 4
- Click on required check box

19

- Click on Next >> Next >> Save and new.

Activity 4: Creation of Fields for Task Object:-

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Auto Number” and Click on Next

4. Fill the Above as following:

- Field Label : Task ID
- Display Format : TASK-{0}
- Starting Number : 1
- Field Name : gets auto generated
- Click on required check box
- Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Task) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Date” and Click on Next

4. Fill the Above as following:

- Field Label : Date
- Field Name : Date

- Click on required check box
 - Click on Next >> Next >> Save and new.
5. Select Data type as a “Picklist (Multi-Select)” and Click on Next

G. Fill the Above as following:

- Field Label : Food Category
- Field Name : Food Category
- Enter values, with each value separated by a new line :

20

Veg

Non-Veg

Salad

Snack

- Click on required check box
- Click on Next >> Next >> Save and new.

7. Select Data type as a “Number” and Click on Next

8. Fill the Above as following:

- Field Label : Number of People Served
- Field Name : Number_of_People_Served
- Click on required check box
- Click on Next >> Next >> Save and new.

9. Select Data type as a “Text” and Click on Next

10. Fill the Above as following:

- Field Label : Name of the Person
- Field Name : Name_of_the_Person
- Click on Next >> Next >> Save and new.

11. Select Data type as a “Phone” and Click on Next

12. Fill the Above as following:

- Field Label : Phone
- Field Name : Phone
- Click on Next >> Next >> Save and new.

13. Select Data type as a “Pick List” and Click on Next

14. Fill the Above as following:

- Field Label : Rating
- Field Name : Rating
- Enter values, with each value separated by a new line :

1
2
3
4
5

21

- Click on Next >> Next >> Save and new.

15. Select Data type as a “Long Text Area” and Click on Next

1G. Fill the Above as following:

- Field Label : Feedback
- Field Name : Feedback
- Click on Next >> Next >> Save and new.

Activity 5: Creation of Fields for the Volunteer Object:-

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Auto Number” and Click on Next

4. Fill the Above as following:

- Field Label : Volunteer ID
- Field Name : gets auto generated
- Click on required check box
- Click on Next >> Next >> Save and new.

To create another fields in an object:

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.
2. Now click on “Fields & Relationships” >> New
3. Select Data type as a “Picklist” and Click on Next
4. Fill the Above as following:
 - Field Label : Gender
 - Field Name : Gender
 - Enter values, with each value separated by a new line :
Female
Male
 - Click on Next >> Next >> Save and new.

22

5. Select Data type as a “Date” and Click on Next

G. Fill the Above as following:

- Field Label : Available On
 - Field Name : Available On
 - Click on required check box
 - Click on Next >> Next >> Save and new.
7. Select Data type as a “Number” and Click on Next

8. Fill the Above as following:

- Field Label : Age
- Field Name : Age
- Click on required check box
- Click on Next >> Next >> Save and new.

9. Select Data type as a “Email” and Click on Next

10. Fill the Above as following:

- Field Label : Email
- Field Name : Email
- Click on required check box
- Click on Next >> Next >> Save and new.

11. Select Data type as a “Number” and Click on Next

12. Fill the Above as following:

- Field Label : Contact Number
- Field Name : Contact_Number
- Click on required check box
- Click on Next >> Next >> Save and new.

13. Select Data type as a “Text Area (Long)” and Click on Next

14. Fill the Above as following:

- Field Label : Address
- Field Name : Address
- Click on Next >> Next >> Save and new.

15. Select Data type as a “Date” and Click on Next

1G. Fill the Above as following:

- Field Label : Date of Birth
- Field Name : Date_of_Birth

23

- Click on Next >> Next >> Save and new.

Activity 5: Creation of Fields for the Execution Details Object:-

1. Go to setup >> click on Object Manager >> type object name(Volunteer) in search bar >> click on the object.

2. Now click on “Fields & Relationships” >> New

3. Select Data type as a “Auto Number” and Click on Next

4. Fill the Above as following:

- Field Label : Execution ID
- Field Name : gets auto generated
- Click on required check box
- Click on Next >> Next >> Save and new.

Milestone 6: FLOWS :-

Create Flow to create a Record in Venue Object:

1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
2. Select the Screen flow. Click on create.
3. Click on the '+' icon in between start and end, and click on the screen element.
4. Under the Screen Properties:
 - Label : Venue Details
 - API Name : Venue_Details
5. Now let's add components in this flow. Click on Text Component and name it as:
 - Label : Venue Name
 - API Name : Venue_Name
- G. Click on Email Component and name it as:
 - Label : Email
 - API Name : Contact_Email
7. Click on Phone Component and name it as:
 - Label : Phone
 - API Name : Contact_Phone
8. Click on Text Component and name it as:
 - Label : Venue Location
 - API Name : Venue_Location

9. Click on Number Component and name it as:

- Label : Latitude
- API Name : Latitude

10. Click on Number Component and name it as:

- Label : longitude
- API Name : longitude

11. Next click on Done. This would like below

12. Click on the '+' icon in between Venue details and end, and click on create record element.

13. Now label it as

- Label : Create Venue Record
- API Name : Create_Venue_Record
- How Many Records to Create : One
- How to Set the Record Fields : Use separate resources, and literal values
- Object : Venue
 - Set Field Values for the Venue : Click on ‘Add Field’ 5 times
 - Field : Value = Contact_Email_c : {!Contact_Email.value}
 - Field : Value = Contact_Phone_c : {!Contact_Phone.value}
 - Field : Value = Name : {!Venue_Name}
 - Field : Value = Venue_Location_c : {!location}

- Field : Value = Location_Latitude_s : {!latitude}
- Field : Value = Location_Longitude_s : {!longitude}

14. This would look like:

15. Click on Save as:

Flow Label : Venue Form

Flow API Name : Venue_Form

26

Milestone 7: TRIGGER :-

Activity 1: Create a Trigger :

1. Log into the trailhead account, navigate to the gear icon in the top right corner.
2. Click on developer console and you will be navigated to a new console window.
3. Click on the File menu in the toolbar, and click on new >> Trigger.
4. Enter the trigger name and the object to be triggered.

5. Enter Name : DropOffTrigger
 - sObject: Drop-Off Point_c
- G. Click on Submit.

27

Activity 2: Trigger Code :

(This Trigger is to assign the Distance field to the Distance Calculation field. So that we can assign the distance in the sharing rules.)

Code:

```
trigger DropOffTrigger on Drop_Off_point__c (before insert) {
```

```

for(Drop_Off_point__c Drop :
    Trigger.new){ Drop.Distance__c =
    Drop.distance__c;
}
}

```

Phase 4 : Data Migration, Testing & Security

Milestone 8 : PROFILES :-

1. Go to setup page >> type Profiles in Quick Find bar >> click on Profiles >> click on ‘S’
2. Click on Clone beside Standard Platform User.
3. Under Clone Profile:
Profile Name : NGOs Profile
4. Then click on Save.

Milestone 9 : CREATION OF USERS :-

In our Project we consider them as NGO’s.

Activity 1: Creation of User1 :-

1. Go to setup page >> type users in Quick Find bar >> click on users>> New user. 2. In General Information give details as: (Note : create users as per your wish NGO’s) •
First Name : Iksha Foundation
• Last Name : Iksha_Foundation

28

- Alias : iiksh
- Email : Give Your Email
- Username : ikshafoundation@sb.com (give the username different)
- Nickname : Auto Populated
- User License : Salesforce Platform

- Profile : NGOs Profile
- Active : Check

3. Click on Save.

Activity 2 : Creation of User2 and User3 :-

1. Create another Two Users by following steps in Activity - 1 with similar User License and Profile.
2. Give Different First Name, Last Name based on Different NGO's.

29

Milestone 10 : PUBLIC GROUPS :-

Activity 1 : Creation of Public Group 1 :

1. Go to setup page >> type Public Groups in Quick Find bar >> click on Public Groups >> click on New.

2. Under Group Information:

- Label : Iksha
- Group Name : Iksha
- Grant Access Using Hierarchies : Check

3. In Search, Select Users.

4. In Selected Members Add Iksha Foundation.

Activity 2 : Creation of Public Group 2 and 3:-

1. By Following Steps in Activity 1, Create other two Public Groups for other two users.
2. After Saving this would look like this.

Milestone 11: REPORT TYPES :-

Activity 1: Creation of Venue with DropOff with Volunteer Reports :-

1. Go to setup page >> type Report Types in Quick Find bar >> click on Report Types >> click on Continue >> Click on New Custom Report Type.

30

2. In Define the Custom Report Type:

- Primary Object : Select Venues
- Report Type Label : Venue with DropOff with Volunteer
- Report Type Name : Venue_with_DropOff_with_Volunteer

- Description : Venue with DropOff with Volunteer
- Store in Category : Select Other Reports
- Deployment Status : Deployed

3. Click on Next
4. Near Click to relate another Object Select Drop-Off Points.
5. And also select "A" records may or may not have related "B" records.
- G. Now again Near Click to relate another Object Select Volunteers. 7.
- Now click on Save.

Activity 2 : Creation of Volunteers with Execution Details and Tasks :-

1. Go to setup page >> type Report Types in Quick Find bar >> click on Report Types >> click on Continue >> Click on New Custom Report Type.
2. In Define the Custom Report Type:
 - Primary Object : Select Volunteer
 - Report Type Label : Volunteers with Execution Details and Tasks •
 - Report Type Name :Volunteers_with_Execution_Details_and_Tasks •
 - Description : Volunteers with Execution Details and Tasks
 - Store in Category : Select Other Reports
 - Deployment Status : Deployed
3. Click on Next
4. Near Click to relate another Object Select Execution Details. 5. And also select "A" records may or may not have related "B" records. G. Now click on Save.

Milestone 12 : REPORTS :-

Activity 1 : Creation of Report on Venue with DropOff with Volunteer :-

1. Go to the app(FoodConnect) >> click on the reports tab
2. Click on New Folder.
 - Folder Label : Custom Reports
 - Folder Unique Name : CustomReports
3. Open Custom Reports and click on New Report
4. Select Report Type : Venue with DropOff with Volunteer
5. Then click on Start Report.
- G. In GROUP ROWS : Add Volunteer Name
7. In Columns : Add Venue Name, Drop-Off point Name, Distance.

8. Now click on Save & Run.
9. Give Label as :
10. Report Name : venue and Drop Off point
11. Report Unique Name : Auto Populated
12. Click on Select Folder and select Custom Report, then click on Save. 32

Activity 2 : Creation of Report on Volunteers with Execution Details and Tasks :-

1. Go to the app(FoodConnect) >> click on the reports tab

CONCLUSION :-

By leveraging the Salesforce platform, the project successfully established a streamlined and transparent system for managing surplus food donations. Through efficient coordination with volunteers and timely delivery to beneficiaries, the project effectively addressed food insecurity while maximizing the utilization of available resources.

The project “*To Supply Leftover Food to Poor using Salesforce*” has been successfully implemented and demonstrates the practical application of Salesforce CRM for social good.

- **Project Achievements:**

- Streamlined the process of collecting and distributing leftover food.
- Ensured real-time coordination between donors, volunteers, and NGOs.
- Automated workflows through custom objects, fields, Flows, and Apex triggers.
- Improved transparency using reports, dashboards, and sharing rules.

- Enhanced usability with Lightning App, Home Page, and role-based security.

- **Student Learning Outcomes:**

- Hands-on skills in Salesforce development and CRM customization.
- Improved problem-solving through real-time use case implementation.

39

- Team collaboration in handling requirement analysis, development, and testing.
- Exposure to industry-relevant tools and project lifecycle management.

Future Scope:

- Integration with **mobile platforms** to allow easier donor and volunteer participation.
- Use of **advanced analytics and AI** to predict demand and optimize food distribution.
- Collaboration with more **NGOs, hotels, and community centers** for greater reach.
- Expansion to a **multi-region system**, ensuring maximum utilization of surplus food.
